A course conducted by Udemey which was of 19 Hours on 'C, C++, Python & Linux/Unix shell scripting course bundle' on 30th March, 2020 was successfully completed.

Concept related to following topics were covered in this course:

1. Write standard code using C programming
2. Write standard code using C++ programming
3. Process of writing shell scripts that solve real-world problems.

The faculties were awarded with certificate of completing the course.

List of faculty completed the course:

1. Anjali Gaikwad

2. Archana Dhawade

## **Course Content:**

### **Module 1: C and C++ Programming**

It is the basic foundation of any programming languages. All the programming languages like java, C# or any object oriented programming language are all inherited from c and C++.

In this course you will learn all the basic fundamentals of c and C++ from scratch then proceed to advanced topics.

In this course each and every topic is explained with example programs to understand the concepts better, there are many practical examples in this course, you will Learn the course by practicing the code as you go along with the course.

Once you finish the course you will be able to

Write your own code in C

Write your own code in C++

Understand Object Oriented concepts in C++

Will be able to understand any standard code written in c and C++ and able to modify them according to the requirement

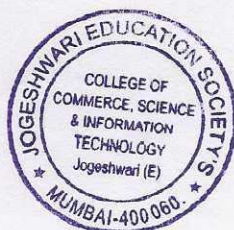

### **Module 2: Python**

This course will teach you Python in a practical manner, with every lecture comes to a full coding screencast and a corresponding code notebook! Learn in whatever manner is best for you!

We will start by helping you get Python installed on your computer, regardless of your operating system, whether its Linux, macOS, or Windows, we've got you covered!

We cover a wide variety of topics, including:

Command Line Basics

Installing Python

Running Python Code

Strings

Lists

Dictionaries

Tuples

Sets

Number Data Types

Print Formatting

Functions

Scope

args/kwargs

Built-in Functions

Debugging and Error Handling

Modules

External Modules

Object-Oriented Programming

Inheritance

Polymorphism

File I/O

Advanced Methods

Unit Tests and much more!

### **Module 3: Linux/Unix Shell Scripting**

Here is what you will get and learn by taking this Shell Scripting course:

A step-by-step process of writing shell scripts that solve real-world problems.

The #1 thing you must do every time you create a shell script.

How to quickly find and fix the most common shell scripting errors.

For those of you who want to start scripting right away, watch the two video shell scripting crash course. If you do nothing else than watch these two videos, you'll be ahead of most shell programmers.

How to accept input from a user and then make decisions on that input.

How to accept and process command line arguments.

What special variables are available, how to use them in your shell scripts, and when to do so.

A shell script creation check list -- You'll never have to guess what to include in each of your shell scripts again. Just use this simple check list.

A shell script template (boilerplate). Use this format for each of your shell scripts. It shows exactly what to include and where everything goes. Eliminate guesswork!

Practice exercises with solutions so you can start using what you learn right away.

Real-world examples of shell scripts from my personal collection.

**Course:** Introduction to Artificial Intelligence

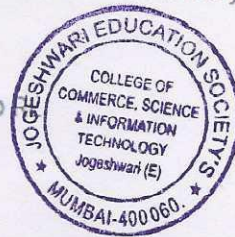

**Date:** 22 Apr 2023

**Organized by:** NPTEL

**Overview:** The course introduces the variety of concepts in the field of artificial intelligence. It discusses the philosophy of AI, and how to model a new problem as an AI problem. It describes a variety of models such as search, logic, Bayes nets, and MDPs, which can be used to model a new problem. It also teaches many first algorithms to solve each formulation. The course prepares a student to take a variety of focused, advanced courses in various subfields of AI.

**Course:** Computer Network

**Date:** 23 Apr 2020

**Organized by:** NPTEL

**Overview:** The domain of Internet has grown in a rapid pace from traditional circuit switched and packet switched small scale networks to modern high-speed mobile and wireless Internet. A large number of methods, architectures and designs came up at every protocol level to cop up with the demands for developing a secure and highly dependable information technology infrastructure. The broad objective of the course is to understand - (i) the architecture and principles of today's computer networks, (ii) the protocols and their functionalities, (iii) the requirements for the future Internet and its impact on the computer network architecture. In this course, we'll broadly cover the basic TCP/IP protocol stack and touch on the next generation computer networks. We'll take a top-down approach to cover different protocols at the TCP/IP protocol stack.

## Course layout

- Week 1 : Introduction to Computer Networks – History, Circuit Switching and Packet Switching
- Week 2 : TCP/IP Protocol Stack – Basic Overview
- Week 3 : Application Layer Services (HTTP, FTP, Email, DNS)
- Week 4 : Transport Layer Primitives – Connection Establishment and Closure
- Week 5 : Flow Control and Congestion Control at the Transport Layer
- Week 6 : Transmission Control Protocol – Basic Features, TCP Congestion Control
- Week 7 : Network Layer Primitives – IP Addressing
- Week 8 : IP Routing – Intra Domain Routing Protocols, Inter Domain Routing Protocols (BGP)
- Week 9 : IP Services – SNMP, ARP
- Week 10 : Data Link Layer Service Primitives – Forwarding, Flow Control, Error Control
- Week 11 : Media Access Control - Channel Access Protocols, Framing
- Week 12 : End to End Principles of Computer Networks

## About Google Ads certifications

Ads certifications are professional accreditations that Google offers to individuals who demonstrate proficiency in basic and advanced aspects of Google Ads.

A Google Ads certification allows you to demonstrate that Google recognizes you as an expert in online advertising. You can access Google Ads certifications on the Skillshop Google Ads Certification page

By earning the Google Ads Search Certification, Google recognizes your ability to:

- Translate a vision for online marketing into a coherent digital marketing strategy
- Develop a Google Search strategy with wider company marketing plans
- Generate a plan to increase leads, sales or web traffic using Google Search
- Ensure your Search marketing plan is aligned with your digital marketing budget

Demonstrate your mastery of building and optimizing Google Search campaigns. Certified users will exhibit the ability to leverage automated solutions like Smart Bidding and Audience Solutions to boost campaign performance for specific marketing objectives.

Date of Training: -10<sup>th</sup> may2020 to 15<sup>th</sup> may 2020

Mode: - Online

Organising college: -JAHIND COLLEG OF ENGNEERING

Topic: - R language for Analytics and data science

In these 6 day FDP we were taught about R language for Analytics and data science as it was tough time for students during COVID. R is an advanced language that performs various complex statistical computations and calculations. Therefore, it is widely used by data scientists and business leaders in multiple fields, from academics to business. Moreover, R interprets the data in a graphical form, making it easy to interpret and understand. These session is very helpful to help us to do it has static graphics that produce good-quality data visualizations.

**Course Name:** Virtual Classroom  
**Duration:** 21<sup>st</sup> May to 25<sup>th</sup> May  
**Organized by :** KAIZEN FUTURETECH  
**Resource person:** Manoj Kevadia

**Overview**

The webinar began with an insightful overview of the online virtual classroom program under consideration. This program, as described, is a web-based platform designed to facilitate remote learning and teaching. It provides a wide array of tools and features for educators and students, making it possible to conduct classes, engage with learners, and deliver educational content entirely online.

The "Online Virtual Classroom Program" webinar was a valuable experience, shedding light on the transformative potential of online education. It is clear that virtual classrooms, when harnessed effectively, can enhance academic practices, engage students, and promote inclusivity. However, it was acknowledged that there are challenges, particularly regarding technical issues, engagement, training, privacy, and inclusivity.

## eLEARNING IN LOCKDOWN

Date: 21<sup>st</sup> May, 2020

Organising institute: Reena Mehta College

Mode: Online Webinar

### Report:

This online webinar was of one day.

Banking and Insurance Department of Reena Mehta College organised one day webinar under IQAC in collaboration with MADDO Foundation. Session was of two hours in which how to upgrade ourselves in lockdown time was explained very well. The situation of COVID was a new face of life and during this crucial hour it was needed to learn how to update with technology and how to learn even during lockdown was the intent of this webinar.

The investment of two hours was indeed fruitful.
