

BEST PRACTICE II

1. Title of the Practice: Teaching Computer Fundamentals to the students of Guru Nanak English school

2. Objectives /Intended outcomes of this Best Practice: and what are the principles /concepts of this practice?

- To create a sense of pride and accomplishment among the students .
- Fostering collaboration between institutions.

3. The Context: The contextual features or challenges that needed to be addressed in designing & implementing this practice?

The challenge that needed to be addressed was that the students of JES the peer teachers had to be given confidence that they would be able to teach small children of Guru Nanak English School.

4. The Practice: (The uniqueness of the practice in the context of Indian Higher Education).

This initiative uniquely empowers students as peer educators, bridging academic learning with social responsibility. Senior JES students volunteered as digital literacy trainers at a school, reinforcing the 'Digital India' vision. This hands-on mentorship promotes leadership, community engagement, and skill-based learning beyond traditional classroom settings.

5. Evidence of Success: The feedback given by the School Management, Principal, the Class Teachers and the Students was that they were happy with the training conducted by the JES students. The school authorities felicitated the students and issued them Internship certificates.

Such endeavours reflect the institution's commitment to equipping students with essential life skills and contributing positively to the community.

1. Problems Encountered and Resources Required: The problem encountered was that these students used to go for teaching after their lectures were completed. As a result, they used to reach at 11.30 am, so the lectures allotted to them were the last lectures.

Absolutely no money spent. The students selected were those who were staying close to the school. After conducting lecture used to go home.

2. Notes By participating in this program, students not only honed their technical expertise but also embraced qualities like empathy and teamwork, underscoring the broader impact education can have on societal development.
